AutomataCore Labs

MULTI-USER WIKIS FOR COMPANIES

PageRiver

Publish together. Share right.

PageRiver turns TiddlyWiki into a multi-user publishing platform for companies, from one team to the whole organisation.

Live sync · Sharing per wiki · Archive & restore · Self-hosted

/ THE PROBLEM

From scattered files to one living wiki

Today

- ✕ Versions lost in inboxes and drives
- ✕ A wiki nobody dares to edit
- ✕ Everyone sees everything, or nobody does

With PageRiver

- ✓ One wiki per team, always current
- ✓ The right people edit, everyone else reads
- ✓ The owner decides who is invited

How it works

1

Create a wiki

Give it a name. You are its owner.

2

Invite people

Add colleagues by email as reader, writer or admin.

3

Work together

Edits reach everyone within about a minute.

Members of Company Handbook Share

A Alice owner	B Bob read	C Cara write

/ FEATURES

Everything a publishing team needs

Many authors, one wiki

Colleagues write side by side. Each save is signed.

Sharing per wiki

Read, write or admin, set by the wiki's owner, person by person.

A clean reading view

Readers get the content, without tools they don't need.

Live sync

Changes appear for everyone within about a minute, no reload.

Archive and restore

Freeze finished projects. Still readable, restorable anytime.

Your data, your database

Every page is a row in your PostgreSQL. Back it up, query it.

3
permission levels per wiki

≈1 min
for an edit to reach everyone

1 row
per page, in your own database

/ FOR EVERY ORGANISATION

Big or small, it fits

Small teams

- Start with one wiki on one server
- Invite people as you go
- Nothing new to learn: it's TiddlyWiki

Big companies

- A wiki per department, each with its owner
- Admins archive or remove any wiki
- Everything stays in your infrastructure

We implement it with you

1. Look at how your teams share today
2. Install on your servers and move your content in
3. Train your editors and go live

Ask for a live demo

See sharing, the reading view and archiving on your own content.
